Yankton County  
Emergency Management

Yankton County  
Search and Rescue

This program will be a mix of all specialties including tactical, search and disaster to meet your specific needs.

*"Awesome class with very knowledgeable instructors. Highly recommend this class to everyone, whether you are Fire, EMS or Law Enforcement. See you all next year!"*

*"One of the best classes I've taken in 16 years."*

*"Very practical and hands-on."*

*"There is so much experience in so many different fields that I did not hear a question go unanswered."*

### Multidisciplinary Expertise

K9 MEDIC™ rallies together the worlds of Special Operations Tactical Medicine, Veterinary Medicine, Wilderness Medicine and Human EMS. Experts in these areas continuously deliver leading-edge knowledge, techniques and been-there-done-that reality to our constantly evolving program, setting the standards and defining the industry.

### The Challenge:

- Are you wary of the dangers of working the streets, unsure of how to best to care for your 4-legged partner in the event of a GSW or stab wound?
- Are you often 20-40min or more from the closest 24HR Veterinary ER?
- Are you concerned that your veterinary training is clinic-based, not tactically sound, and doesn't address the realities of your most common scenarios?
- Do you know the formal Canine-Tactical Casualty Care (C-TCCC) guidelines?

### K9 First Aid + C-TFA (Canine Tactical First Aid)

This introductory program covers the essentials of responding to the most common medical emergencies whether your K9 is working on the street, training hard, or having some R&R at home.

Topics including vitals and assessments, bandaging, preventing and treating heat injuries, subcutaneous fluid administration (aka Camel Backs for K9s), and tactical first aid.

The program includes interactive lectures, demonstrations and hands-on exercises that are predominately taught with the entire class at once and some small team exercises. Handlers are encouraged to bring their own K9s to practice taking vitals and restraint techniques.
